Estimate Indicates That Building Will Reach \$5,000,000 Mark In Edmonton for the Present Year

FAT FACINATION IN THE SILVERY SLOCAN

"THERE ARE SHIRINS IN BRAIN THEY CAN NEVER FORGET"—GEORGE

British Empires Beyond the Sea Due to Become Greater in Population and Riches but Loyal Hearts Will Always be Centred in the Motherland—Great Tribute to Canada by Chancellor of the Exchequer at Banquet to the Colonial Premiers

London, May 31. (Through Reuters agency)—David Lloyd George, chancellor of the exchequer, at the Eighty Club dinner on Saturday evening proposed "Our Guests" and said: "We are gathered here to welcome the prime ministers of the great self-governing dominions of the British Empire."

"We welcome them not merely for great distinction of their careers, but also for the positions they hold and the great peoples they represent. This is no party demonstration; none the less it is a demonstration by a party of welcome."

"We regard the self-governing dominions with special pride. The conferring of self-government upon great communities of the empire is the

greatest of all achievements of Liberalism. Our great statesmen in the past, faced misrepresentation and obloquy, dared even political ruin to confer freedom on their great communities. "We sow with pride how they have grown in strength, influence and power, but in all the acts of self-government they added to the store of experience from which the country can draw in settlement of its great problems and as a party we feel we can share in the triumphant vindication of democratic government which they present to the civilized world. We also observe with a glow of satisfaction how, as they assume the form and attitude of independent communities, they draw from the motherland, draws. Generation by generation, de-

cade by decade, conference by conference, it flourishes. Year by year it has born fruit, and will bear more abundant fruit in the future, for it has the rich soil of liberty (Cheers.)

"There is no greater mistake than to imagine that narrow patriotism excludes the wider one. We have another special interest as Liberals in our self-governing dominions. We study and watch with care and admiration the spirit of emulation of their bold social experiments (Cheers) and it is an inspiration for us to see how the daring spirit of patient courage has transformed a vast wilderness into a fertile province, how they are also inspiring

FOUR BURNED TO DEATH IN HOTEL FIRE IN SILVERTON

CENSUS ENUMERATORS COMMENCE TOMORROW

Tomorrow morning several thousand enumerators all over the Dominion will commence the task of counting the heads of Canada's population and gathering all manner of information about industries, resources, crops and general development of the country.

Twenty-eight enumerators will be employed to carry on the work of census taking in Edmonton and in the Edmonton district, which comprises all the territory lying north of the Saskatchewan river in Alberta, and the commissioner for which is Major De Blois Thibadeau, there will be 87 enumerators. During the past two weeks Major Thibadeau has been engaged in instructing the enumerators who will work in the district.

WHITE AUSTRALIA OR A SEPARATION

MELBOURNE, Australia, May 31.—William Morris Hughes, acting premier of the Commonwealth, in a remarkable article which he has contributed to the Sydney Telegraph, declares that Australia will never agree, except at the sword's point, to admit Japanese immigrants, even should such a refusal mean separation from the mother country.

FIVE MILLION YEAR IN CITY BUILDING

PERMITS TO DATE TOTAL TWO MILLION AND A HALF WITH SEASON SCARCELY COMMENCED—MAY A GOOD MONTH FOR CONSTRUCTION.

Building permits to the amount of \$381,425 have been issued by the city building inspector for the month of May as compared with \$231,055 for the corresponding month last year. Permits for the year to date amount to a trifle over \$2,500,000 and at the present rate there is evidence that the building this year will break all previous records, and will approach the five million mark.

Permits for buildings valued at approximately \$30,000 were taken out yesterday afternoon and this morning, the most important of these being a permit for the erection of a \$10,000

PRINCIPLE BLOCK IN THE LITTLE VILLAGE BY THE LAKE WIPPED OUT BY EARLY MORNING BLAZE—BOB McTAGGART, OLD TIMER IN THE CAMP, AMONG THE VICTIMS.

SERIOUSLY INJURED TAKEN TO NELSON

VANCOUVER, B. C., May 30.—A special from Nelson, B. C., says a disastrous fire occurred at Silvertown early this morning, totally destroying an entire block of the town, including the Victoria hotel, the Windsor hotel, Mrs. Carey's grocery and W. H. Bran's store, the latter being occupied by E. Pattequin and family.

Robert McTaggart, of Sandon, Robert Fairgrieve, F. L. Fairgrieve bartender at the Windsor, and a resident of Phoenix, name unknown, were burned to death in the Windsor. The two hotel registers being burned, the names of all the guests are not yet obtainable, and possibly others are also in the ruins. Several persons stopping at the Windsor were badly burned and those most injured have been brought to the hospital here.

(Continued on Page Five.)

MOUNTAIN PARK COMPANY INCORPORATED TO DEVELOP HOLDINGS IN BRAZEAL

WITH CAPITAL OF \$1,500,000 NEW CORPORATION PROPOSES TO OPEN 15,000 ACRES AT HEADWATERS OF THE McLEOD.

Development of the resources of the Brazeal coal fields on a colossal scale will be undertaken by the Mountain Park Coal Co., Ltd., a company capitalized by Scottish financial men with a total capitalization of \$1,500,000. Incorporation of the company has just been granted under the provincial companies' ordinance. The company holds 15,000 acres of coal lands adjacent to the headwaters of the McLeod.

The capital behind the company is intended to be used for the taking, and the development of the coalfields of the Brazeal by this company within the next few years, will open up to commerce one of the richest mineral territories in the northwest. Provisional directors of the company are G. C. Bremner, of Glenora, H. W. Jones of this city and S. B. Woods, while a number of eminent Scottish financial men are supplying the capital necessary to the development of the Brazeal fields. Supplies were taken into the present territory this spring by Mr. Jones and a number of his associates in the enterprise. Since the spring opened the company has been engaged in the grading of a new line, 25 miles in length from mile 37 on the Brazeal branch of the G. T. P. which is shortly to be constructed and which will eventually be taken over by the G. T. P. The twenty-five mile line to be graded is to be constructed and which will be constructed almost parallel to the banks of the McLeod river. At mile 37 the branch line of the G. T. P. divides, one track branching off to serve the coal fields of the Pacific Coast Coal Co., the other serving the fields of the Mountain Park Coal Co.

No Decision in Subways Until Railway Commission Arrives in Edmonton

ENGINEER PREPARING COST OF ESTIMATE FOR MAYO, SYNDICATE AND FIRST-CITY NOTIFIED THAT LIFE MUST BE POSTPONED.

Speaking to the Capital this morning Commissioner Hamilton announced that a decision regarding the construction of subways on Xanayo, Syndicate and First street would be reached until the Railway Commission meets here some time next fall. The city engineer has been instructed to bring in an estimate as to the cost of the subways but in view of the fact that the commissioners first want to learn the desires of the railway commission it is improbable that the report will be submitted until some time in August or September.

Two years ago the railway commissioners instructed the city engineer to have designs for the installation of points where the street railway and steam railway tracks meet but later this decision was waived for the time being. The city commissioners have been advised, however, that steps must be taken immediately to safeguard the public and it is thought that the railway commission will recommend that subways be installed immediately. Should they do so the city engineer will prepare the plans and work will be started on the subways early in the spring.

RYAN AND PARKER TO SPEAK AT DEMOCRATIC CONFERENCE

St. Paul, Minn., May 31.—Arrangements are all completed for the big Democratic conference here tomorrow, in which the party leaders of all the northwestern states will take part. The conference will be followed by an actual banquet in the evening at which William J. Bryan of Nebraska and Alton B. Parker of New York are expected to be the chief speakers.

MILITARY WEDDING IS SOLEMNIZED AT FORT MYER TODAY

Washington, May 31.—The administration building at Fort Myer was the scene of an attractive military wedding today when Miss Lucy Lewis Garfield, daughter of Gen. and Mrs. Joseph Garfield, became the bride of Lieut. Victor Foster of the 15th Cavalry. Miss Valerie Garrard, a sister of the bride, was maid of honor and the best man was Capt. Howard H. Shultz. Fellow officers of the bridegroom acted as ushers and appeared in full dress uniform.

VINEGAR COMPANY CHANGES ITS NAME

R. E. McLEARN WAS NEVER CONNECTED WITH VINEGAR COMPANY

An article in Monday's paper stated that R. E. McLearn was convicted for the theft of raw materials of vinegar production. Mr. McLearn was formally a member of the firm which is now the Western Vinegar Co., but more recently a member of the Edmonton Vinegar Co., which was the rival concern in which behind the theft was committed. "The Western Vinegar Co." is the name newly adopted by the Montreal R. E. McLearn, which was established by McLearn, but from which he was subsequently eliminated.

PASSENGER WRECK MICHIGAN CENTRAL

ENGINEER AND FIREMAN KILLED AND NUMBER OF PASSENGERS INJURED—BROKEN RAIL

Detroit, May 31.—A westbound Michigan Central passenger train is reported wrecked about nine east of Hulettsville, Ont. The engineer and fireman are said to have been killed. While it is reported a number of passengers were injured, it is not known whether any are dead. The accident is attributed to a broken rail.

SUNSTAR WINS THE DERBY OVER FIELD OF TWENTY-SIX

Romps Over Line with Two Lengths to Spare and Annexes Prize of Over \$30,000 for His Owner

Epsom, Eng., May 31.—The Derby stakes, following the 2,000 Guineas, and the fillies foaled in 1908, over about one mile and a half, was won here today by J. B. Joe's Sunstar, by Sandringham, 12 to 8. Lord Derby's Stedfast, by Chancery, 10 to 1, was second, and Capt. P. Forester's Royal Tender, by Persimmon, 10 to 1, was third. True, 25 to 1, was fourth, and Phryxus fourth. The field numbered 26, a record for the race, and Sunstar's field in 1867. The also ran in

cluded the Canadian colt Kel O'Neil and the following: Zorzi, Shorshi, Duke of Lancaster, King William, Duke of Allan, Tim Healy, Norman, Niaz, Barcham, Synchron, Longshot, Bachelors Hope, Chelys Court, Adam Bede, Alan Melton, Gelati, Royal Bay, Pietro, Bryony, Amah and Royal Eagle. The form of the two thousand Guineas came out in remarkable fashion and confirms the impression that Sunstar is a great race horse. The Guinness Sunstar was first, Stedfast

second and Lyeon third. Lyeon did not run and the recently named Royal Tender was third, being the best backed of the outsiders, having won two or three races for Forester this spring and showed fine staying powers. The winner had a clear two lengths to spare at the finish and was ridden by George Storn, the French jockey, who has had the mount on his previous engagements this spring. He was trained by Morton.

WILL NOT BUILD HOTEL IF CITY FAILS TO RATIFY G.T.P. SITE AGREEMENT

HAYS WIELDS SANDBAG OVER HEADS OF CITY—THREATENS TO WITHDRAW FROM EDMONTON IF BYLAW IS PROTESTED.

Charles M. Hays, president of the Grand Trunk Pacific railway who was in the city this morning stated to the Capital that if the bylaw providing water and light at cost, a fixed assessment and the closing of certain lanes on the property on McDougall avenue purchased recently by the railway company as a site for a palatial hotel, is not finally ratified the company will abandon the project to erect the hotel and will sell the property for business purposes."

Mr. Hays said this morning that he understood there was a movement on foot to have the bylaw annulled and for this reason operations were being delayed and would be until the company was sure it was finally passed.

It was rumored at the time that the hotel men of the city were about to protest the bylaw and have the ballots counted over again in an attempt to have it defeated. No action was taken, however. Mr. Hays said this morning that he understood there was a movement on foot to have the bylaw annulled and for this reason operations were being delayed and would be until the company was sure it was finally passed.

Commissioner Butchart Does Not Approve of Additional Paving

SAYS EXPENDITURE OF EXTRA \$100,000 WOULD BE BAD FINANCE—WILL NOT ALLOW IT TO GO ON IF HE HAS ANYTHING TO SAY.

Providing the investigating committee adjourns in time, there will be a meeting of the commissioners this afternoon at which the contracts for paving will be let. The tenders from three different companies have been submitted to the city engineer for analysis and his report will be before the commissioners this afternoon when they are called upon to award the contract and decide which streets are to be paved this year.

The commissioners will also appoint a new superintendent for the streets and works department. A large number of applications have been received, but no decision has been reached as yet. "This city will not spend \$225,000 on paving this year if I have anything to say about it," was the statement made to a Capital representative this morning by Commissioner Butchart. Discussing the council's decision to bring down a bylaw providing for expenditure of an additional \$100,000 on paving this year, the commissioner declared that it was bad finance. It was one of the numerous decisions jumped to without due deliberation, he said, and there was a possibility that much harm might be done to the city. "The council passed our estimate for \$125,000 worth of paving, this year," said the commissioner, "and then was the time when they should

VETERAN TELLS HOW COL. BURNABY DIED

Joseph Tierney, Formerly Staff Sergeant Describes Attempt to Relieve General Gordon

THE EXPEDITION UP THE NILE WITH THE CANADIAN VOYAGEURS—KITCHENER IN THE INTELLIGENCE DEPARTMENT—BERESFORD AND HIS QUICK-FIRERS—CRUMPLING OF THE BRITISH SQUARE—DEATH OF GALLANT BURNABY—FALL OF KHARTOUM AND KILLING OF GENERAL GORDON—ADU KLEA—MARCH TO ASSUAN.

Vancouver, B. C., May 31.—At the corner of Vernon Drive and Hastings street there is a small general store and the owner of the store, Joseph Tierney, a short, stout, and elderly man, can tell several exciting stories which the humor takes him.

Twenty-six years ago all the world was startled by the news of the death of the hero General Gordon at Khartoum after a gallant defense against the Mahdi and his horde of desert Dervishes and Joseph Tierney was one of the men who struggled through the miles and miles of burning desert in a vain effort to bring aid to the gallant soldier trapped up in the fever stricken doomed city of Khartoum. The story of what the relieving army suffered will never be fully told; how they marched through the burning sands with the pitiless desert sun burning down upon them, how men wandered away from the column, crazed with the heat and their bodies were never recovered. Still they struggled forward for the Queen had ordered them to go and civilization demanded that Gordon should be rescued.

And then after weeks of endurance came the ghastly news of the downfall of Khartoum and of the scenes of murder and pillage which marked its capture and the death of General Gordon, stabbed to death with a thousand spears outside the building which had been his headquarters. All their toil, suffering and death had been in vain and they had nothing to look forward to but a return over the blazing sands, with thousands of the victorious and blood-thirsty Dervishes hanging on their rear murdering the wounded and keeping up a ceaseless fire on the troops as they marched wearily on.

Mr. Tierney, or Staff Sergeant Tierney as was his military title, related his experiences to the World representative the other day.

The Relief of Gordon.

"I joined the army in 1878," said the veteran, "being assigned to the Royal Horse Artillery. I was sent to Gosport—fort Brockton—which is the depot. After three months I was selected for a teacher in the military school. I was transferred from there to Portsmouth headquarters school. When in 1882 trouble broke out in Egypt and volunteers were called for to go to the relief of Gordon.

"I volunteered and passed all the required examinations. In August of that year I sailed with about 2,000 others on the Malabar. Queen Victoria on the royal yacht "Victoria and Albert" watched our departure. We were landed at Adalia and remained there a while, when we were ordered to Egypt. We landed at Alexandria and immediately mounted four 40 pound breech loading guns on Fort Kom-el-Dick. The town was a wreck. The buildings were crumpled down and large projectiles were lying around which had been fired from the British warships, innocent of having done any harm.

"We were shortly moved to Cairo, in cattle trucks, packed like a lot of sheep in a pen. We were then sent to Abessyria barracks outside the town and there for the first time converted into mountain battery, with seven pound guns, of 222 pounds weight each with mules. After a lot of early morning drills and manoeuvring, we were given camels and seven pound guns of 100 pounds weight, which served on from the truncheons. They were splendid screw guns, and we had fine practice with them.

Ordered Up Nile

"In 1884 we were ordered up the Nile. The army was made up of the following: The Egyptian Field Force and a lot of soldiers could be told about him. He could speak Arabic like an Arab and was able to learn things of inestimable benefit to the army. At one point our outposts captured three Arabs supposed to be using camels of their rifles and others were brought in and placed under guard in a tent. In a little time the Arabs were thrust into the tent and he immediately commenced to jabber Arabic to the captives. After the Arabs had been talking quite a while the new camel approached the sentry on guard and in faultless English requested to be allowed to go. The sentry was much surprised but an officer of the Egyptian force coming up the sentry was informed that it was all right. Next day the Arabs were marched out and ordered to dig their graves and they were shot that morning.

"The officer Arab was Lord Kitchener and he had not only found out that the men were spies, but also a lot of the plans of the Dervishes. On another occasion, by his knowledge of Arab tongue, Kitchener was able to upset a system of "wireless telegraphy" which the Dervishes had set up. The Dervishes knew what we were doing. The men working the wells at the river bank used to send runners with the news to each well along the bank of the river and as the messenger arrived from the last well, the next man would hear the message and then news would travel very quickly and the enemy were always well informed as to our movements. Kitchener disguised himself as an Arab and took one of the wells. When the messenger arrived and repeated his message to Kitchener he started out to carry the news, but, needless to say, the news never reached the next man and thus one chain was broken.

At Gok-Dul Wells

"We halted at Gok-Dul Wells for several days for the arrival of Col. Burnaby, who was bringing up the commissariat. While at Gok-Dul we captured a lot of Bedouins and a large number of camels. The chief of the Bedouins was of great help to the headquarters staff, for he knew every part of the desert.

"From Gok-Dul we started for Metemnah, but one evening in January, 1885, we were halted about 5 o'clock, and our artillery, officers, Major Johnston, Captain Norton and Lieutenants Guthrie and Dufour came among us and ordered us to have everything ready for action in a few minutes, as the enemy were ambushed in the hills.

"We kept moving in square formation, hillier and hillier, until it was getting dark, when a piece of ground that was pretty rocky was chosen near Abu-Klea, and every man had to give a hand and strive up a stone wall about three feet high. When the night began to be a little bit dark, but not so dark as it was to be, the word was passed in and that no word was to be spoken and no fires or lanterns lighted.

Results were: Packed

"During the time several men were employed in packing the camels in the hills. Under cover of darkness the time was taken, several darks east and west of where we were camped and during the night those hills in the hills riddled them with bullets and not a shot reached us, and we saved our ammunition. In the early morning they saw their mistake and they began to pour into us as quickly as possible. We were soon formed into a square leaving the camels in the hills and women to the mercy of the hospital flag. In the evening we forced the enemy to move out of the hills. Our little guns did good work, and we knocked Howitzer after Howitzer over.

"The enemy rushed down on the left wing of the square with yelling and beating of tom-toms. Lord Beresford had his three quick firing naval guns in the hills and women to the mercy of the hospital flag. The enemy rushed right down upon the square in spite of the never ceasing fire, and jumping over the piles of their dead and wounded, buried them.

Nile. The leading characters were General Lord Wolseley, Sir Herbert Stewart, Major General Earle, Lord Charles Beresford, Colonel Burnaby, Colonel Wilson and Colonel Boscawen, also Kitchener Pasha, now Lord Kitchener. The war correspondents were Melita Prior, Bennett Burleigh, Cameron, who was killed and Wilton.

"I have a little book which a friend gave me and I kept a diary of some of the principal events which occurred after we reached Wady Halfa. We remained at Wady Halfa several weeks while the Canadian Voyageur got the whale boats up the rapids of the Nile at that point and their work in bringing the heavy boats up the river was wonderful. We had to remain here until the remainder of the column came up and when they arrived we moved on to Corti where Sir Garnet Wolseley had his headquarters. The Nile flowed across the baynash desert and Corti was situated just at the point where the bend commences. A point nearly opposite, but very much further up the river was Metemnah which is about a hundred miles below Khartoum. The plan of campaign was for a force to go up the river to Metemnah accompanied by the gun-boats, while our column under the command of Sir Herbert Stewart marched across the baynash desert to form a junction with the river force who were under the command of General Earle.

Kitchener's Work

Kitchener Pasha, now Sir Herbert Kitchener, was then attached to the Intelligence staff of the Egyptian Field Force and a lot of stories could be told about him. He could speak Arabic like an Arab and was able to learn things of inestimable benefit to the army. At one point our outposts captured three Arabs supposed to be using camels of their rifles and others were brought in and placed under guard in a tent. In a little time the Arabs were thrust into the tent and he immediately commenced to jabber Arabic to the captives. After the Arabs had been talking quite a while the new camel approached the sentry on guard and in faultless English requested to be allowed to go. The sentry was much surprised but an officer of the Egyptian force coming up the sentry was informed that it was all right. Next day the Arabs were marched out and ordered to dig their graves and they were shot that morning.

"The officer Arab was Lord Kitchener and he had not only found out that the men were spies, but also a lot of the plans of the Dervishes. On another occasion, by his knowledge of Arab tongue, Kitchener was able to upset a system of "wireless telegraphy" which the Dervishes had set up. The Dervishes knew what we were doing. The men working the wells at the river bank used to send runners with the news to each well along the bank of the river and as the messenger arrived from the last well, the next man would hear the message and then news would travel very quickly and the enemy were always well informed as to our movements. Kitchener disguised himself as an Arab and took one of the wells. When the messenger arrived and repeated his message to Kitchener he started out to carry the news, but, needless to say, the news never reached the next man and thus one chain was broken.

Beresford Takes Command

"Lord Charles Beresford took command of us on a camel with a wounded officer on each side, and Charles on the other with an arm in a sling. Next morning at daybreak we formed up in line and marched to Metemnah, a fortified town, which we shelled for several hours. The outer walls were very thick and the shells would burst themselves in it. Still we fired into the town caused quite a blaze. Toward evening he gave in and returning to the force, he made a spherical shell from one of the enemy's guns struck a camel I was leading on the side of the head and the flesh and blood of the animal was splattered all over me. This shell did not burst, but it struck a gunner and also killed him. The force with which I was hit knocked me down. I was picked up by the ambulance stretcher bearers and when I came to I found myself lying with many others in a row more dead than alive.

"I felt better after the rest I had had, and then I made an examination of myself and found it was only a lot of old camel flesh hanging on to me. All I wanted was something to drink and eat. I learned later that I was reported dead in the despatches, and my brother went to the war office to claim my effects. But I am not dead yet.

Had Hot Time

"For three weeks we had a hot time of it. We dug a deep trench, put a zeraba of mimosa trees outside, and then wire entanglements. Reconnoitering and foraging was our night and morning work. We were down to quarters rarely, so we had to hunt for rats and cook it in bull beef tins. Some cut the meat quarters from the slain camels and cooked and ate them. One evening General Bulwer, with the Eighteenth, thirteenth and seventh Hussars, all on foot, were in sight. The sight of them made our hearts which were pretty low, jump for there was no one among us who thought we would ever get back.

Fall of Khartoum

"After we had a friendly Dervish came into the camp with the news that Khartoum had fallen and that Gordon and all those with him had been murdered.

COUNCIL DECIDES TO SPEND \$225,000

ON PAVING DURING THE PRESENT YEAR—CIVIC RECEPTION TO BE PLANNED.

That the city of Edmonton should spend considerably more than \$125,000 on paving this year was the argument advanced by Aldermen Grindley and Mould at the council meeting last evening with the result that the council decided to submit a further bylaw which will provide for the laying of \$225,000 worth of pavement this year instead of \$125,000 worth. Of this the city's share will only be about \$30,000 the rest being chargeable as a local improvement.

Alderman Grindley pointed out that there are a large number of streets which should be paved and in view of the fact that Calgary is spending nearly a million dollars on paving this year Edmonton has the appearance of standing still in this respect.

One of the chief topics discussed was a proposal by Alderman Hyndman and Melman that the city tender a civic reception to Her R. L. Borden, leader of the opposition in the Dominion house, when he visits the city in June. It was agreed that some sort of reception should be tendered Mr. Borden and the special committee of the council was instructed to bring in a report at the next meeting as to the form which the reception would take.

York and McNamara requested information as to the possibility of securing city property for a warehouse site, the building to cost \$100,000. The majority of the members of the council considered that it was not advisable to use industrial sites as warehouse sites. The industrial committee was instructed to bring in a report at the next meeting when the entire question will be thoroughly thrashed out.

The council upon the recommendation of Alderman McMillan named Wednesday, June 14th, as the date on which the commissioners will sit as a court of revision on the land assessment.

Mr. T. H. Witley, medical health officer, was given a grant of \$125 as expense money in connection with his

attending the Dominion Medical conference in Montreal, June 6 to 9. M. A. Stoval applied for permission to install light arcs in front of his block on Nanyva avenue. Referred to commissioners, engineer and building inspector, with power to act.

W. M. McMillan wrote the council re the establishment of places of amusement at the east end park. The alderman considered that some such plan should be adopted as it would benefit the street railway. Referred to the street railway superintendent for a report.

D. M. McMillan, city assessor, asked that the salaries of two of his clerks be increased. Referred to the finance committee.

Alderman Lundy also asked for a report on what the extra caused by alterations in the plans for the market building and scale platform, would amount to.

HOSPITAL BOARD ASKS FOR \$50,000

NURSES HOME WILL COST \$33,000—COUNCIL FINANCIAL COMMITTEE WILL SUBMIT REPORT.

At the meeting of the council last evening the board of directors of the Royal Alexandra hospital applied for a further grant of \$50,000, this sum to be used in the erection and equipping of a nurses' home, sterilizing and operating room fittings, architect's fees, etc.

A. G. Fraser appeared for the directors and stated that this money was a necessity inasmuch as \$23,000 was needed for the erection of a nurses' home, independent of the building proper. He thought that the price of the home was high but they were unable to get the figure reduced. It had been originally set at \$50,000.

Alderman Melman, among other members of the council, considered that a palatial home could be erected for that amount and thought that the

COMMISSIONER BULLION WAS DISLIKED BY FORMER HEADS OF DEPARTMENTS

Commissioner Butchart Admits Lancey and Davidson Told Him They Had no use for Utilities Commissioner—Investigation Drawing to Close

During the course of his testimony yesterday afternoon Commissioner Butchart admitted, when pressed by Mr. McCall for a definite answer, that both ex-Chief Lancelotti and ex-Chief Davidson had told him that they had no use for Commissioner Bullion.

"I was true that he had seconded the motion to dismiss Superintendent McNaughton and his manager. The mayor had protested, contending that these men should be told why they were being dismissed and was told that it was in the 'public interest'."

With respect to the alleged statement of Commissioner Bullion that the Edmonton trunk works had he'd up the construction of the pump house, failing to deliver cost on time, the commissioner declared that he never heard such a statement.

The commissioner also testified that he had nothing to do with the purchase of pumps, spare motors or a motor generator. These matters were usually handled by Commissioner Bullion while he looked after the financial end. He knew nothing of the market building, as the plans were approved while he was in the city and he had no part in the scale question, however, with the result that a larger scale was installed.

Commissioner Bullion, Cross-examined by C. G. McCall, Mr. Bullion admitted that he had said there was an overexpenditure at the power plant and that at the time he made the statement he did not hear of Mr. Butchart dissenting.

With respect to the market building, the commissioner attempted to evade all responsibility by stating that Mayor Lee had interested himself in that question and had handled the question almost entirely. He was not especially attempted to shift the responsibility to Mr. Lee, but had only paid a little attention to the plans.

Asked as to whether or not it was his duty to examine the plans the commissioner put in the equivocal answer of "I have always handled questions on their merits."

Mr. McCall—"Did you approve the plans?"

Bullion—"We deal with them on their merits."

McCall—"I want a definite answer."

Bullion—"That is all the answer you will get out of me."

McCall—"Were they properly drawn?"

Bullion—"Our duty was to inspect them as they were drawn."

McCall—"You are doing a great deal of fencing, Mr. Bullion. Why cannot you answer a straight question, is there something you are afraid of?"

With respect to the spare motors the commissioner stated that he knew along in the summer that they would be needed. Asked by Mr. McCall as to why the motors were not ordered until February, the commissioner had no answer to give.

Dealing with the question of the purchase of hose the commissioner stated that he had bought a cheaper hose than the fire chief wanted because he could not bring anything up against the hose they wanted to buy. Mr. McCall pointed out that the chief had desired a certain type of hose with which he was familiar and which he

board should see if the building could not be erected cheaper. After considerable consideration and debate the question was referred to the hospital and public works committee with instructions to bring in a report.

The detailed statement submitted by the directors of the hospital, showing the amount needed, together with the amounts already received from the city is as follows:

General and concrete contract	\$475,840
Heating and ventilating	25,000
Plumbing	9,000
Electric wiring and fixtures	2,750
Elevators	5,500
Laundry machinery	3,515
Hardware	2,000
Telephones	150
Grounds	1,000
Fencing and driveways	1,500
Vacuum cleaner	1,200
Site	20,000
Architect's fees at 5 per cent.	11,522

Construction of nurses home	\$251,977
Gas producer	32,000
Architect's fees	850
Furnishing nurses' home	1,600
Sterilizing and operating room fittings	3,450
Main and diet kitchens and other furnishings	3,710
Salaries	3,000
Taxes	333
Sundries	350

Total	\$49,213
Total grant received from city to date	\$225,000
Proceeds from sale of site	35,000

	\$261,000
Additional grant required to complete construction of hospital and home with furnishings and fittings	\$50,000

Mr. McCall—"Did you approve the plans?"

Bullion—"We deal with them on their merits."

McCall—"I want a definite answer."

Bullion—"That is all the answer you will get out of me."

McCall—"Were they properly drawn?"

Bullion—"Our duty was to inspect them as they were drawn."

McCall—"You are doing a great deal of fencing, Mr. Bullion. Why cannot you answer a straight question, is there something you are afraid of?"

With respect to the spare motors the commissioner stated that he knew along in the summer that they would be needed. Asked by Mr. McCall as to why the motors were not ordered until February, the commissioner had no answer to give.

Dealing with the question of the purchase of hose the commissioner stated that he had bought a cheaper hose than the fire chief wanted because he could not bring anything up against the hose they wanted to buy. Could Not Rest at Night

Back Was So Weak.

Weak, lame and aching backs are the primary cause of kidney trouble. When the back aches or becomes weak it is a warning from the kidneys that everything is not right with them.

heed the warning: cure the weak, lame, aching back and dispose of any chances of further trouble.

If you don't do this, serious complications are very apt to arise and the first thing you know you will be troubled with Dropsy, Diabetes or Bright's Disease, the three most deadly forms of kidney trouble.

From the first sign of anything wrong Doan's Kidney Pills should be taken. They go to the seat of the trouble and strengthen the kidneys, thereby strengthening the back.

Mr. John Puigh, Parkdale, Man., writes: "I have used Doan's Kidney Pills and find nothing to beat them. I could not rest at night my back was so weak. I tried everything, but could not get anything to do me any good until I was told by a friend to use Doan's Kidney Pills. I tried them and I am now the same weak woman I was before. I am very thankful to have found so speedy a cure."

Doan's Kidney Pills are 50 cents per box or 3 for \$1.25, at all dealers or mailed direct on receipt of price. The T. M. M. Co., Limited, Toronto, Ont.

If ordering direct specify "Doan's."

Savannah in the South Atlantic league have been the distinction of having an outfielder, three players who broke into baseball as first basemen.

THERE ARE SHRINES

(Continued from Page One.)

the effort which is extracting humanity from the undergrowth of the social jungle in which it is encumbered.

"In this land the growth is older and the denser fibre is sturdier, it is easier to be difficult and labor and toil that we can cleave our way through it, but we are doing it slowly, laboriously, until I hope at last we shall cut away for humanity to march through to the light.

"This is an old country, not done with yet (cheers). This country has not come to the end of its great career. There are still chapters to be written which will seem with subtle deeds that have yet been recorded, even in its great past. The country which founded the greatest empire the world has ever seen, means to prove that it can also rise itself of the social evils which undermine its strength and dim its lustre.

"The old country is not done, but if we are not at the end of the old country, these new dominions are only at the beginning of their greatness. The pioneers who have brought us today with their presence, whom we welcome with such pleasure, delight and cordiality, now represent their sons and sons, and distant when either they or their successors will come to the old country and represent their sons and sons. They have the great uninitiated future before them.

"The old country Britain and will outgrow Britain in strength, population, power and position, but they will never outgrow their affection for the old country. There are shrines in Britain they can never forget. It is the land of Shakespeare, of the old world which has been the generations of men and women dared death to fight for freedom of soul.

"However they may grow, whether their pride, their power, their influence, these things will draw them to the old country with increasing affection, with increasing attention, until we shall one day be one mighty people, one purpose and idea, in devotion to the service of God and Man. (Prolonged cheers.)

FATAL CONFLAGRATION IN SLOAN

(Continued from page 1)

In addition to the deaths from burning, those severely injured are: J. W. Gohrman, both ankles dislocated; W. Windoff, one ankle and neck burned; John Francis, cook, face and hands burned. Several others had serious injuries, having hair singed and faces or hands blistered as they rushed from the fierce clutch of the fire which enveloped the entire block in a few moments.

Duncan Grant, owner and proprietor of the Windsor House, barely escaped with his wife and child, down an outside ladder, all inside avenues of escape being cut off.

At greater part of that time he had been engaged in the direction of industry or work of various kinds requiring experience. Mr. Parsons began as an apprentice "in the shops," and he obtained that knowledge of practical mechanics which is an essential part of the modern engineer. WHO IS PARSONS?

(Continued from Page One.)

MAN WHOM BOULLION REFUSES TO CONSIDER AN AUTHORITY HAS PLENTY REFERENCES

HIS QUALIFICATIONS

Engineer Parsons, whose professional knowledge Mr. Boullion affects to disparage, is a member of the Institute of Civil Engineers of Great Britain, and the author of articles and papers on steam turbine practice. He served a full apprenticeship to the trade and has been engaged in the design and manufacture of almost all classes of steam and electrical machinery.

In their attempt to explain away the blunders of the utilities commissioner, and by a campaign of innuendo to convey the impression that the experts who have differed from Commissioner Boullion are a coterie of incompetents, the council's hired assassins, members of the pre-Boullion faction, have not scrupled to cast aspersions on the bona fides of the men who have been called in to save the city from disastrous error in matters requiring a wide range of technical knowledge.

The record of Engineer Parsons, whose opinion corroborated that of all the other experts as to the folly of proceeding with the proposed power plant, has been called in to save the city from disastrous error in matters requiring a wide range of technical knowledge.

Engineer Parsons' record has been shielded off as the chief point of attack, and because the critic of Boullion policy in the matter of turbines has been called in to save the city from disastrous error in matters requiring a wide range of technical knowledge.

Mr. Parsons began as an apprentice "in the shops," and he obtained that knowledge of practical mechanics which is an essential part of the modern engineer. During his term of apprenticeship he spent twelve years in the shops, and he obtained that knowledge of practical mechanics which is an essential part of the modern engineer.

REALTY MARKET CONTINUES STEADY

(Continued from Page One.)

RESIDENTIAL PROPERTY AND SUBDIVISION STUFF ACTIVE—NO HOUSES TO RENT

Just at the present there are a number of large deals pending in Edmonton subdivisions and in property in the outlying districts that is considered suitable for subdividing, according to local real estate men. The names of the parties who are negotiating for the property are not mentioned as that would not be considered good policy in any realty office, but one local dealer is negotiating with a man from Vancouver for the sale of 160 acres of property adjoining the city. It is the intention of this capitalist to put the property on the market immediately in subdivisions, if suitable terms can be arranged for its purchase.

Another prominent local firm is negotiating for the purchase of subdivision property in blocks of anywhere from 100 to 250 acres. It is expected that these deals will be consummated this week.

During the past week some good deals in residential property have been put through although the demand for this class of property is confined almost exclusively to those people who wish to build immediately.

There is still a slight demand for warehouse property on the streets where space and facilities are available or projected. One deal is pending on Fourth street near Jasper avenue at the present time.

The Hudson's Bay reserve, the Great estate and Inglewood are the sections of the city in which the greatest demand for residential property is being experienced. Considerable building is being carried on in these subdivisions. There is a steady demand for lots in the new building program, and here also a number of houses are in the course of erection.

Houses in the west end of the city are in good demand and these are being picked up as rapidly as they are offered for sale. About the only houses that become available for rent just now are those which are vacated by persons moving into new houses.

One of the very few sales of Jasper avenue property have been reported of late.

ONE KILLED AND SEVERAL INJURED IN CONTEST AT INDIANAPOLIS

Indianapolis, May 30.—One man was killed and several badly injured here today in a five hundred mile automobile race, the great 24-hour event.

The race was held at the Indianapolis Motor Speedway, a track of 2.5 miles. The race was won by Harry Miller, driving a Fiat, who finished second and third respectively.

The most serious accident of the day was when S. P. Dickson, of Chicago, mechanic for Arthur Greiner, driving an Amplex car, lost his life in an upset on the first lap of the race.

Mr. Parsons began as an apprentice "in the shops," and he obtained that knowledge of practical mechanics which is an essential part of the modern engineer. During his term of apprenticeship he spent twelve years in the shops, and he obtained that knowledge of practical mechanics which is an essential part of the modern engineer.

FIRE HALL NO. 4 FOR WEST END

(Continued from Page One.)

PLANS UNDER WAY FOR NEW STATION ON SIXTEENTH ST.—TO COST \$13,000—READY OCT. 1

Plans for a new fire hall for the protection of the west end of the city, similar to the structure erected last year on First street near the boulevard are being prepared by H. A. Macdonald, architect. Tenders for the construction of the building which is to be erected on the east side of Sixteenth street between Jasper and Athabasca avenues have already been called for and will be opened by the commissioners on June 5th. Tenders for fire hall equipment will be opened on June 2nd.

The new building on Sixteenth street will furnish accommodation for a hose wagon, a chemical engine and seven men. It will be furnished with the equipment now in Fire Hall No. 2. The new equipment, including the motor-driven chemical engine, will be installed in the hall on Fourth street. The plans show a building 60 by 40 feet in dimensions, facing west on Sixteenth street. In the plans there are stables to accommodate 5 horses, and a house for the fire hall crew.

On the main floor, which will be of re-inforced concrete, built on the ground, there will be a space of 28 feet by 22 feet for equipment. Opening to this there will be two double door entrances of regulation size in the front of the hall, a small entrance leading to the office and the stairway.

In the upper story of the hall provision is being made for a large recreation hall, four bedrooms and a bathroom. The heating plant will be installed in a basement which will extend the full length of the hall on the south side. The basement will be devoted to the storage of the building and space for storing fuel.

The buildings will be equipped with a hose tower 70 ft. in height which will be built on the north east corner of the building.

Construction work will be proceeded with immediately following the completion of the contract and an effort will be made to have the fire fighting equipment in the hall ready for operation by October 1st. The building will cost in the neighborhood of \$13,000. It will be known as fire hall No. 4.

CHAMP POLO TOURNAMENT OPENS TODAY

(Continued from Page One.)

IMMENSE CROWD HAS GATHERED AT LONG ISLAND FOR THE INTERNATIONAL TOURNAMENT

New York, May 31.—Polo enthusiasts and society folk gathered in force at the Meadowbrook Club on Long Island today for the opening match in the international cup contests. The tournament will continue until June 7.

The contestants represent the best polo talent of Great Britain and America. The prize is the American challenge cup, now held on this side of the Atlantic. The British team carries the colors of the Hurlingham club and is made up of the best polo players in the British army. King George, since 1894, when the American Cup was won by an English team, at Newport, the matches for it have been played in England.

Harry Payne Whitney is the captain of the defending team. The other members are Lawrence and J. M. Waterbury, Jr., and Devereaux Hillburn.

The present tournament affords practically the first opportunity for polo enthusiasts in this country to witness a big international match. Since 1894, when the American Cup was won by an English team, at Newport, the matches for it have been played in England.

Harry Payne Whitney is the captain of the defending team. The other members are Lawrence and J. M. Waterbury, Jr., and Devereaux Hillburn.

AMATEUR LEAGUE OPENS WITH SENSATIONAL GAME

Y. M. C. A. Wins By Score of Eight to Seven But Were Nearly Defeated in the Ninth, Retailers Coming Back With a Brilliant Batting Rally Showing Three Runs Over the Plate By Clean Hitting; Next Game Thursday

For amateur ball it was a good game that the Y. M. C. A. won from the Retailers in the opening contest of the city baseball league at Diamond park. The score was eight to seven and the Y. was lucky to pull out as well as they did. They started the game off well making three in the first, one in the second, and one in the third and it was not until the sixth innings that the Retailers began to mend their fortunes. They made one run in the sixth and by sensational batting in the ninth almost succeeded in tying the game. At the start of the ninth the score was eight to four and the Retailers made four successive hits before a man got out. Then with one on base, a grounder to third was evaluated which resulted in a double put-out and the Y. saved the game just as it looked like a draw according to the big parade came off according to schedule, about 18 automobiles participated in the affair, fully decorated with banners and flags, bearing the teams in uniform and officials.

President Michaels pulled off a new stunt by opening the game by seven, they got a safe hit over the third base. He did it gracefully and received loud applause.

The Y. played better ball than did the Retailers, their fielding being better. They pulled off several double plays and some sensational fielding. The hitters have some good men. White on third although he made two errors played a fine game making three safe hits and taking several chances that might have been hits. Hogan in left field had five chances and took them all. He swatted a hit that resulted in two runs. Roberts on first base played an almost faultless game. At bat five times he made three hits and on the first sack his position was well handled.

Crump for the Retailers, although he was hit for 13 hits, pitched a good game, striking out ten men and issuing only one pass. Gossnell was wild and had the Retailers been wise they would have simply stood on the plate and allowed him to walk them instead they swatted at everything he threw.

In the first innings the Y. pulled off a nice double play, Roberts, Blayne and Burns being the principals in it. Again in the ninth the same men pulled off another double which retired the side after it had all but tied the score by a sensational batting streak.

The Y. M. C. A. got three runs in the first on two hits, a walk, and a couple of errors that occurred at the wrong time. The Retailers seemed to make an ascension. In the second they got another by an error in the

outfield and a safe hit, after two men were out. In the third their run was obtained on a safe hit, a stolen base and another safety. In the seventh three safe hits together with a stolen base was responsible for two runs and in the eighth a two bagger and a couple of safeties brought in the last run they made.

The Retailers started scoring in the seventh, in that innings a long hit to the outfield with a clean infield grounder made their first tally. In the eighth they got three, a safe hit, a walk, another safety, a little wild throwing and some excitement being responsible for the runs. In the ninth they rallied and made another on three successive hits.

The game was a fairly good exhibition of baseball and the attendance, which was about 250 was smaller than it deserved. Harold Deaton refereed in a satisfactory manner. The box score was:

A.B.	R.	H.	P.	O.	A.	E.
Drayton, c.f.	5	1	2	1	0	1
Van Norman, s.s.	5	1	2	1	2	1

ESKIMOS PULL OUT A WIN IN THE TENTH ACT

Both Teams Play Errorless Ball Ten Innings But Edmonton Out Hit the Maroons Who Were Unable to Locate Baxter's Slants

Winnipeg, May 31.—The Winnipeg and Edmonton teams had another extra session struggle yesterday, when the visitors changed affairs by landing a victory in the tenth round by the count of 4 to 3. Both teams played errorless ball, and it was anybody's game until the finish. The Eskimos punched six of their eight hits off Syfert in three innings, which accounted for all their runs. Pitch started on the mound for the Maroons, but after three runs were scored off him to his wildness, Baxter relieved him and held the game safe.

FINNS WIN RACE

New York, May 31.—In a 20-mile race here today, I. Kottmann of Finland finished half a mile ahead of Gustaf L. Jundstrom of Sweden in 1:28:25. Jim Crowley of the Irish-American A. C. was third and Trent of Columbus was fourth. Henri St. Yves and Tom Longboat, the Canadian, and thinking he might desire to retire from base ball, Mr. Newman telegraphed the offer. It is believed Mr. Powers will sell. It is reported that the Peoria franchise may be bought by the same interests which owned the Bloomington club and recently sold it to Quincy. Dave Rowan who is part-owner of the Peoria franchise and manager, has retired as manager. Second baseman Charles Sills being named in his place.

Merchant Wants to Buy Ball Club in Ill

Danville, Ill., May 31.—Otto Newman, a prominent merchant of this city, has offered Owner Powers of the local I.-I.-I. club, \$5,000 for a controlling interest in the club. President Powers has taken up his home at Los Angeles, and thinking he might desire to retire from base ball, Mr. Newman telegraphed the offer. It is believed Mr. Powers will sell. It is reported that the Peoria franchise may be bought by the same interests which owned the Bloomington club and recently sold it to Quincy. Dave Rowan who is part-owner of the Peoria franchise and manager, has retired as manager. Second baseman Charles Sills being named in his place.

They call base ball the "national" game in the states, but at that it is more of a public institution in Canada. In one of the cities of the Canadian league this city board of public works had the work of making the grounds done at public expense.

Mathewson Makes a Fortune on Wall St.

New York, N.Y., May 31.—Gauging Wall street is that Christy Mathewson of the New York National league club has "cleaned up" something like \$75,000 in a deal in stocks in the past week. This deal was not Mathewson's first successful one, by any means, but it was his first big venture, and he declares that it will be his last. He has put aside a fortune estimated at \$150,000, and is said to be the wealthiest player in the business.

Y.M.C.A. TRACK TEAM ELECTS ITS OFFICERS

IT LOOKS LIKE A BIG YEAR FOR THE NEWLY-ORGANIZED TRACK TEAM AT THE Y.

A meeting of the members of the Y. M. C. A. track team was held in the parlors of the building last night and officers elected for the coming year. Practices will be held every Tuesday and Thursday evenings and Saturday afternoon and that a weekly handicap meet be held every week, the first being next Tuesday when 100- and 200- yard sprints and the high jump will be the main events. Following are the officers:

Pres., R. B. Chadwick.
Hon. Coach: G. B. Jackson.
President: Dr. Polinschke.
Vice-Pres.: P. S. Barney.
Sec.-Treas.: E. A. Cameron.
Manager: J. H. Valentine.
Executive committee of officers and Messrs. Roberts and White.

HAL CHASE RECOVERS SLOWLY

New York, N.Y., May 21.—While the condition of Hal Chase, the sick manager of the New York American league club, shows improvement, it is stated he will not be able to play ball for several months and may not regain his good health for a long time.

Brooklyn base ball writers, having exhausted every other sort of criticism of the poor showing of the team, now say there are not enough Irishmen on the team to make it a proper fighting organization. And the same day two "Dutchmen" were chased for umpire balling.

ST. LOUIS MAKES OFFER OF \$2,000 FOR PETE STANDRIDGE

St. Louis, May 31.—Special Correspondence.—From a Calgary point of view the race in the West Canada League hinges on how many games Standridge can pitch and win. This mighty flinger is the Walter Johnson of the Midnight circuit and his work has already attracted attention from the big leagues. A few weeks ago the St. Louis Nationals offered \$2,000 for his release, which was refused and it is rumored the offer has since been doubled.

THE DEACON IS MAKING TRADE WITH WINNIPEG

Is Willing to Give the Maroons Collins for Krueger to Fill the Short Stop Position When Mills Retires to the Outfield—Is Satisfied With Baxter

Winnipeg, May 30.—Am trying to arrange trade with Winnipeg of Pitcher Collins for short stop Krueger. Will know tomorrow the decision. My pitchers are going all right although Skilman is unable to work. He cannot curve a ball yet, Baxter pitched a swell game today and I put him in the line up for eight innings. If I can get Krueger it will fix me up all right, gives me the best fielding shortstop in the league, a great base runner and

DYSPEPSIA ADDITIONAL

Can Be Cured.

This disease is one of the prevalent evils of civilization, and one which is not cured by any ordinary treatment. It is a disease of the stomach, and is caused by a general weakness of the digestive system, which is the result of a general weakness of the system. It is a disease of the stomach, and is caused by a general weakness of the digestive system, which is the result of a general weakness of the system.

The best way of treating dyspepsia, which is a disease of the stomach, is to give the system a general tonic. This can be done by the use of a general tonic, which will give the system a general tonic. This can be done by the use of a general tonic, which will give the system a general tonic.

Mr. Herman Deibes, Denver, N.Y. writes: "I have used Dr. Williams' Pink Pills for Pale People, and I have found that it has cured my dyspepsia, and I have found that it has cured my dyspepsia, and I have found that it has cured my dyspepsia."

NO MORE WARMING UP BEFORE INNINGS SAYS PRES. JOHNSON

Chicago, Ill., May 31.—As a result of the long baseball games this season, caused by the use of the rubber-cork-horseshoe ball, President Johnson of the American League has announced the abolition of the pitcher's privilege of throwing five balls to warm up at the opening of each inning. The fault of the unusually long games this year is laid by President Johnson to the players and umpires as well as to the new ball, which has made heavy hitting a daily occurrence.

JAW STARTS CLIMBING BY BEATING B.P. ON 6 ERRORS

It Was a Clean Shut-Out, the Score Being Five to Nothing When Game Ended.
SASKATCHEWAN MADE SOME BALLOON ASCENSIONS
The Losers Were Off Color—They Were Wounded on the Bases and Glassy at the Bat, While Moose Jaw Played in Stellar Form on the Eastern Side of the Circuit—They Made Six Errors.

Moose Jaw, May 30.—Moose Jaw won the second game tonight by a score of 5 to 0 from the Berypore. Case, a fast right hander, pitched for Saskatoon, and being a little wild at first, Fournier and Kelly got on base. Moose Jaw's defense was excellent and caught home in the third session. Hurley should have been out standing third, but Carney's wild throw sent him to first. Manning held the Berypore runners unless the sky, when he passed the first two men up and allowed two singles and made an error which netted the home team three tallies. In the eighth inning, Kelly was hit by Manning, and Morgan and a single allowed three more runners to cross the plate.

Brandon
Brandon, May 31.—The Calgary leaders went down to defeat last night in their first contest with Brandon. The score was 6 to 3. The first inning opened with the visitors scoring two runs on a walk, a sacrifice and three batters and a single. After this Brandon tightened up and pitched beautiful ball, and the visitors were unable to score again until the ninth inning when two were down, Morgan knocked a two-bagger and came home on Martin's single to tie the field. Manning held the Brandon runners unless the sky, when he passed the first two men up and allowed two singles and made an error which netted the home team three tallies. In the eighth inning, Kelly was hit by Manning, and Morgan and a single allowed three more runners to cross the plate.

REAL ESTATE BULLETIN

In the business sections, Jasper Avenue and warehouse sites have changed hands during the last 24 hours, and there is further demand.

In residential lots, the only movement at present is in lots for immediate building upon.

In houses, there is considerable enquiry and movement, almost entirely confined to the West End.

Suburban property, suitable for subdivision, continues in good demand.

Alberta Park

Further sales are being made daily in this suburb, as the prices have not been advanced, as is the case with all adjoining lands.

Buy now and secure the benefit of the advance.

Today's Offerings Business Properties

- A lot on Central Jasper Avenue, south side: per foot \$1800
- A lot on Jasper Ave., Block 4; per foot \$1150
- 2 lots on First St. North, Bk. 1, Northwood: \$7000
- 50 feet on First St., north of tracks; per foot \$330

Residential Properties

- An 18-room modern brick house, furnished, in choice central location: \$15,000
- A 12-room modern house, near new High School: \$8000
- A 9-room modern house on 5th St., south of Jasper: \$5700
- A 9-room modern house, 6th St., south of Jasper, with 2 choice lots: \$9000
- A 7-room house with barn, on a double corner in Inglewood; only: \$2000
- 10 lots in Inglewood for: \$5500

Farm Lands

- 160 acres, partly improved, at Mewassin, good land; per acre \$11
- Easy Terms.
- A half section, highly improved, with good brick house, etc.: \$10,000

Scrap

We keep constantly on hand the following Scrap: South African Veteran. Red River Volunteer. Half-breed. All at current prices.

Loans promptly negotiated. Old Stocks bought and sold.

STRATHCONA NEWS

Tenders In For Paving and Cement Walks

Strathcona, May 31.—Before an audience of paving company representatives, and to the rather uncertain accompaniment of a demonstrative audience in the basement below the chambers who protested valiantly against the council's transacted business, the council transacted considerable business of a routine nature last night.

Mayor Davies was absent and Ald. Richards was called upon to take the big chair for the evening while Ald. Pollard and Tipton were absent from the sides.

Tenders for the proposed paving and cement sidewalks work in the city this season were opened in committee of the whole, the names of the tenderers and the figures being withheld from the audience and press. The papers were then turned over to the public works committee with instructions to report at the next regular meeting. In connection with the paving proposition a report was submitted by the engineer and waterworks superintendent advising against the laying of pavement on the Whyte avenue block between Second and Third streets west where a deep earth fill has been made this spring. In the opinion of these gentlemen the fill proves an unsatisfactory base for paving this year. They also recommended that in future there should be better made several months before the pavement is put down. This would insure against the pavement being damaged by settling.

Chairman Rankin of the public works department asked to have the report laid on the table for a week, in order that the matter might be fully inquired into. He wanted to see the paving programme completed this year as advertised but at the same time he would not favor placing of pavement on a base that might prove faulty. However, good guarantees might be secured from the paving companies.

New Fire Hall Site Bought

After negotiations extending over several weeks, a special committee of the council have secured two well located sites for future sub-stations of the fire department. A sum for this purpose was voted by the ratifyers Monday and the report of the purchase was made by Ald. Rankin last night. A west end site consisting of lots 12 and 13 in Block 112 was bought for \$1200. This site is on First avenue south between Fifth and Sixth streets west. The east end site is located on lots 1 and 5 in block 13 for which \$1000 was paid. Speaking in explanation, Ald. Richards said the sites had been selected by reason of their particularly suitable situation. While fairly close in to the present business section they are removed a sufficient distance from the present north and south corners of the city to leave room for the establishment of other stations in the future. The report was adopted unanimously.

New Fire Chief Chosen
For the fire and light committee Ald. Rankin reported that the recent resignation of L. Sisco as chief of the fire department had been accepted and that Ed. White had been recommended for the position. The report was adopted. The new chief has been a member of the brigade for the past couple of years as driver of the chemical engine and is considered a first-class man for the position.

City Engineer McLean reported for Engineer Evans of the power house and the long-troubled Ventura mill will refuse to work, despite the carefully framed out instructions given by the company selling the machine. It was decided to accept the recent offer of the company, Baur's Foundry Co. of Providence, R. I., to send an expert here to start the mill working, the firm to pay all charges if the machinery is found to be at fault, the city to pay the expert \$6 per day and all necessary expenses if the trouble lies within local conditions.

The Railway Crossing

Rutherford, Jamieson and Grant engineers of the C. P. R. concerning the crossing requested by the city over the railway tracks on First avenue north. Vice-president Whyte would consent to this crossing, indicated the solicitor, providing the city pays all the costs connected with the installation and maintenance of the crossing. Council looked rather askance at the proposition and decided that it should be laid over for further discussion at the next regular meeting.

The Government telephone superintendent wrote asking permission to string a 50 pair cable across Mill viaduct in order that the rapidly increasing number of subscribers on the east side of the creek might be supplied without delay. Referred to public works committee and city engineer for a report.

A number of property owners in Richmond park petitioned for the grading of streets in that subdivision in order that the present tax levy under this sort of improvement is made there. Ald. Rankin explained that a case of 10 men are busily engaged in grubbing and grading large numbers of streets and he expected Richmond park to be reached within another week.

Ald. Vogel asked that a special meeting of the council be held this week to take up again the hospital agreement with the University.

Accounts were unusually light, but \$450 being up for payment.

Who Cuts The Grass?

Under inquiry Ald. Rankin wanted to know what system is in vogue for

the taking care of the city's boulevards. There appeared to be no system. Secretary Cox explained the Edmonton system of charging frontagers for installation, after which the upkeep is paid for out of the general funds. Ald. Calder thought this the plan to be adopted. Ald. Rankin thought the property owners should pay for the whole business. If the expense comes out of the general fund he would have to include \$100 or \$500 more in his estimates for the year, so rapidly have the boulevards extended. Question was referred to public works committee, city engineer and solicitor for a report.

Ald. Richards had a grist of enquiries. Was the space between the C. P. R. rails on Whyte to be paved? General opinion decided this had place might be faced with planking by the company.

Were not the old and disused fire stations many parts of the city a public menace? It was moved and carried that these old tanks should be pulled to prevent any mishaps by their collapse.

Want Better Phone Service

Ald. Richards said he had fault to find with the telephone service at the local central on Sundays and during the evenings after 6 o'clock. At these times there is no employee about the exchange. "For my part I find that my phone usually goes wrong on Sunday," said Ald. Richards, "and I think there are enough subscribers in this town to deserve better consideration from the telephone department."

Council decided to have the secretary write the telephone department calling attention to the situation.

Ald. Vogel moved that the mayor and secretary be given power to sign the remaining contracts for the supply of new equipment to the power house.

On motion of Ald. Vogel council adjourned to meet Friday evening at 8 p.m.

Separate School Board Buys New Site

The school trustees of St. Anthony's school district in this city have just taken up an option on block 12 between Fifth and University avenues in the south end at \$15,000, by way of making provision for a site for another separate school building when the growth of the city makes necessary an addition to present facilities. Following along the progressive lines established by the public school board the trustees of St. Anthony's have for some time been looking out for some suitable site upon which a large central school may be erected when required and that purchased last week is considered as desirable in many respects. By facing on First street west it will be readily seen that with the extension of the city southward in coming years the new site will be centrally located and if the proposed street railway line traverses Sixth avenue and Main it will be easily reached from the business section of the town.

Found Incinerator Satisfactory

Ald. Tipton returned on this morning's train from Calgary where he went on a trip of inspection for the city. Speaking to the Capital News, he said he was very satisfied with the incinerator at Calgary. As for weather conditions the judge said the new site will be centrally located and if the proposed street railway line traverses Sixth avenue and Main it will be easily reached from the business section of the town.

Strathcona Locals

An excellent field of winter wheat is to be found on the farm of Robt. Turnbull some five miles southeast of the city. A sample of this crop which was brought in this week measures eighteen inches in height and Mr. Turnbull states that all the field of seven acres is of the superior class. The winter wheat throughout the district appears to be coming along very promisingly.

Mr. R. H. Christie, D. D. G. M., and Major Marriott, C.M., of the local Acacia lodge will be delegates from Strathcona to the Masonic Grand Lodge which is opening in Banff today. Major and Mrs. Marriott and Mr. Christie left for the south yesterday afternoon.

J. M. Douglas, M.P., will leave tomorrow morning on route to the coronation in London where he will be one of the representatives from Western Canada. His father, Rev. Mr. Douglas, will accompany him as far as Ottawa to attend the General Assembly of the Presbyterian church.

Mr. and Mrs. Scott of this city also left for the east to attend the conference.

BITTER ATTACK ON AUSTRALIA IS AID TO OUR CLAIMS

London, May 31.—The claims of Canada as the oldest and most responsible British imper territory in the matter of colonial emigration are being materially helped here by a severe attack on the home rule character of the inducements of her chief rival, Australia. Several returning colonials are making a smashing attack on the unsolicited advantages of life in the Antipodes which do not appear in the bright intimations of a veritable Eldorado to be gathered from the commonwealth's official immigration agent.

For instance, the land in central and northern Queensland, alleged to "grow anything" in many cases turns out to be absolutely barren, not even fit for sheep-grazing. This is because everything in Australia depends on rainfall, and one season's drought wipes out the proceeds of a dozen fat years. This, of course, tends to make agriculture a great gamble; as a result all the big, prosperous farms are owned by syndicates who do things on a lavish enough scale to make things pay.

Queensland Is Worse

From the evidence of these returning grumblers, Queensland seems to be the worst of the worst. The land is so poor that it is not even fit for sheep-grazing. This is because everything in Australia depends on rainfall, and one season's drought wipes out the proceeds of a dozen fat years. This, of course, tends to make agriculture a great gamble; as a result all the big, prosperous farms are owned by syndicates who do things on a lavish enough scale to make things pay.

NEWS OF THE CITY

Dr. Coffin of Calgary came into the city this morning and is a guest at the Cecil.

Chas. Stewart, M. P. P. for Sedgewick, came into the city this morning. He is registered at the Cecil.

Accompanied by Inspector Phillips of the department of marine and fisheries, J. K. Cornwall, M.P.P., left the city last evening for the north. At Athabasca Landing Mr. Phillips will inspect the boats of the Northern Transportation company.

About half past four yesterday afternoon a runaway occurred in the neighborhood of the C. N. R. Station, a team belonging to the Twin City Cartage company breaking loose in front of the C. N. R. freight sheds, and dashing along McKenzie avenue east. No serious damage was done.

Hon. Duncan Marshall, minister of agriculture, visited the city last evening from the south, where he has been engaged for the past week in arranging for the season's work on the demonstration farms. Contracts for plowing on the new farms will be let in the course of a few days. Mr. Marshall leaves the city again this evening.

Edmonton's remarkable progress and the wave of settlement which is sweeping towards the Peace River, have become the talk of the coast people, according to J. J. Walsh, Canadian manager of the Standard of Empire, who arrived in the city from Vancouver yesterday. Mr. Walsh prophesies that with the conclusion of the coronation festivities in England, an invasion of Canada by British capitalists the like of which has never been seen before will become a reality. It will be the Mecca of the British with money to invest.

On May 31, June 1 and 2, the 18th regiment, The Edmonton Public School cadets, will be inspected by Col. Crumshanks, district commanding officer at Calgary. Recently the provincial department of education entered into an agreement with the department of militia and defence, in accordance with which any province becomes eligible for prizes from the Strathcona trust fund for the encouragement of physical drill and military training in the public school.

The sum of \$70 will be distributed in Edmonton as prizes for the best show in London. Within a month after stocking his land in Queensland, described to him as "God's own country," 15 out of his 19 cows died from the fatal "red water," which the agent had neglected to mention. He sold the remaining four cows, and lost the deposit he paid on his land, for he can find no one to take it off his hands.

Another case of disillusionment is cited even worse than that. A family from Essex started farming with 12 good Yorkshire and Jersey cows, but were unable to find their land would not grow fodder enough even for that number of sheep. So they had to pay \$5 a week to a nearby farmer for grazing land, and though the wife and daughter worked hard at poultry raising, often starting milking at 3 a.m., and not finishing the day's work till seven in the evening, they could not make both ends meet. Then their cows died of the terrible red water and the family were ruined indeed. Now the husband is a casual laborer, the daughter has gone into domestic service, the son is working on a sugar plantation, and the wife has utterly broken down through worry and overwork.

According to this man's estimate, it costs twice as much to live in Australia as it does in England. The unemployed problem is as keen in Brisbane as it is in London. Australia respondent writes that the areas under wheat and grape cultivation are rapidly decreasing in extent. Especially are the days gone by when adventure and fortune awaited the solitary colonist. There is no room now to the working man in modern Australia but that of grinding drudgery.

Reports such as these are being given considerable space in the home papers just now. That accounts for the practical unanimity with which this year's British emigrants are making for the west. Especially is this true of the north countrymen, the best type of settlers to be found. Several batches from Cumberland, Westmoreland, and Yorkshire are leaving this week, their destinations being unidentified.

An agent as "Winnipeg, mostly in Canada, and Colorado, Oregon, Utah and Washington, chiefly in America. They are keen on getting on the land in the west."

CONTRACTORS CONSULT ON CONSTRUCTION OF H. B. R.

Ottawa, Ont., May 31.—Contractors are here today consulting officials of the railway department with reference to construction of the first 180 miles of the Hudson Bay railway for which tenders are to be made. The work will be built first from the past northwards and will cost approximately four million dollars. There is no doubt that supplies on ground next fall and on having work completed by end of 1912.

REAL ESTATE BULLETIN

In the business sections, Jasper Avenue and warehouse sites have changed hands during the last 24 hours, and there is further demand.

In residential lots, the only movement at present is in lots for immediate building upon.

In houses, there is considerable enquiry and movement, almost entirely confined to the West End.

Suburban property, suitable for subdivision, continues in good demand.

Alberta Park

Further sales are being made daily in this suburb, as the prices have not been advanced, as is the case with all adjoining lands.

Buy now and secure the benefit of the advance.

Today's Offerings Business Properties

STRATHCONA NEWS

Tenders In For Paving and Cement Walks

Strathcona, May 31.—Before an audience of about twenty representatives of the city, the tenderers, and to the rather uncertain accompaniment of a demonstrative leader in the basement below the chambers who presided, the city council transferred considerable business of a routine nature last night. Mayor Davies was absent and Ald. Richards was called upon to take the big chair for the evening while Ald. Pollard and Tipton were absent from the sittings.

Tenders for the proposed paving and cement sidewalks work in the city this season were opened in committee of the whole, the names of the tenderers and the figures being withheld from the audience and press. The papers were then turned over to the public works committee with instructions to report at the next regular meeting.

At the meeting, the names of the tenderers and the figures being withheld from the audience and press. The papers were then turned over to the public works committee with instructions to report at the next regular meeting.

NEWS OF THE CITY

Dr. Coffin of Calgary came into the city this morning and is a guest at the Cecil.

Chas. Stewart, M. P. for Sedgewick, came into the city this morning. He is registered at the Cecil.

Accompanied by Inspector Phillips of the department of marine and fisheries, J. K. Cornwall, M.P.P., left the city last evening for the north. At Athabasca Landing Mr. Phillips will inspect the boats of the Northern Transportation company.

About half past four yesterday afternoon a runaway occurred in the neighborhood of the C. N. R. station, a team belonging to the Twin City Garbage company breaking loose in front of the C. N. R. freight sheds, and dashing along McKenzie avenue east. No serious damage was done.

Hon. Duncan Marshall, minister of agriculture, came into the city this morning, where he has been engaged for the past week in arranging for the season's work on the demonstration farms. Contracts for plowing on the new farms will be let in the course of a few days. Mr. Marshall leaves the city again this evening.

Edmonton's remarkable progress and the wave of settlement which is sweeping over the prairie have become the talk of the coast people, according to J. J. Walsh, Canadian member of one of the Standard Oil companies who arrived in the city from Vancouver yesterday. Mr. Walsh prophesies that with the conclusion of the coronation festivities in England, an invasion of Canada by British capitalists the like of which has never been seen before will occur. Canada will be the Mecca of the British with money to invest.

On May 31, June 1 and 2, the 150th regiment, the Edmonton Public School cadets, will be inspected by Col. Grunthausen, district commanding officer at Calgary. Recently the regimental band, which has been entered into an agreement with the department of militia and defence, in accordance with which the band becomes eligible for prizes from the Strathcona trust fund for the encouragement of physical drill and military training in the public schools. The sum of \$70 will be distributed in Edmonton and Strathcona.

BITTER ATTACK ON AUSTRALIANS AID TO OUR CLAIMS

London, May 31.—The claims of Canada as the oldest and most responsible British imperial territory in the matter of colonial emigration are being materially helped here by a sensational article in the London Times on the bona fide character of the inducements of her chief rival, Australia. Several returning colonists are making a smashing attack on the unsuspected disadvantage of life in the Antipodes which do not appear in the bright intimations of a veritable Eldorado to be gathered from the commonwealth's official immigration agent. For instance, the land in central and northern Queensland, alleged to grow anything, in many cases turns out to be absolutely barren, not even fit for sheep-grazing. This is because everything in Australia depends on rainfall, and one season's drought wipes out the proceeds of a dozen fat years. This, of course, tends to make agriculture a great gamble; as is the result all the big, prosperous farms are owned by syndicates who do things on a lavish enough scale to make things pay.

Queensland is Worse
From the evidence of these returning grumblers, Queensland seems to be

STRATHCONA NEWS

Tenders In For Paving and Cement Walks

Strathcona, May 31.—Before an audience of paving company representatives, and in the rather uncertain atmosphere of a demonstrative rally in the basement below the chambers who protested valiantly against dedication in the police cells, the city council transacted considerable business of a routine nature last night. Mayor Davies was absent, and Ald. Richards was called upon to take the big chair for the evening while Ald. Pollard and Tipton were absent from the sides.

Tenders for the proposed paving and cement sidewalks work in the city this season were opened in committee of the whole, the names of the bidders and the figures being withheld from the audience and press. The papers were then turned over to the public works committee with instructions to report at the next regular meeting. In connection with the paving proposition a report was submitted to council last night from the city engineer and waterworks superintendent advising against the laying of pavement on the Whyte avenue block between Second and Third streets west where a deep earth fill has been made this season. In the opinion of these officials this fill provides an unsatisfactory base for paving this street. They also recommended that in future there should be notice of paving given one year ahead in order that water and sewer systems might be made several months before the pavement is laid down. This would insure against the pavement being damaged by settling.

Chairman Rankin of the public works department asked to have the report laid on the table for a week in order that the matter might be fully informed into. He wanted to see the paving programme completed this year as advertised but at the same time he would not favor placing of pavement on a base that might prove faulty. However, good guarantees might be secured from the paving companies. Ald. Vogel and Calder moved to adopt the report at once but it could not be passed until the matter might be fully informed into. He wanted to see the paving programme completed this year as advertised but at the same time he would not favor placing of pavement on a base that might prove faulty. However, good guarantees might be secured from the paving companies.

New Fire Mill Site Bought

After negotiations extending over several weeks, a special committee of the council have secured two well located sites for future sub-stations of the fire department. A sum for this purpose was voted by the council recently and the report of the purchase was made by Ald. Rankin last night. A west end site consisting of lots 12 and 13 in Block 142 was bought for \$1300. This site is on First avenue south between Fifth and Sixth streets west. The east end site is located on lots 4 and 5 in Block 137, which is situated on the corner of 5th and 6th streets east. The sites had been selected by reason of their particularly suitable situation. While fairly close to the present business section they are removed a sufficient distance from the present north and south corners of the city to leave room for the establishment of other stations in the future. The report was adopted unanimously.

New Fire Chief Chosen

For the fire and light committee Ald. Rankin reported that the recent resignation of E. Sage as chief of the fire department had been accepted and that Ed. White had been recommended for the position. The report was adopted. The new chief has been a member of the brigade for the past couple of years, driver of the thermic engine and is considered a first-class man for the position. City Engineer McLean reported for Engineer Exner of the power house that the long-trouble-some Ventura meter still refuses to work despite the carefully carried out instructions given by the company selling the machine. It was decided to accept the offer of the company, Builders' Foundry Co. of Providence, R. I., to send an expert here to start the meter working. The firm to pay all charges if the expert is found to be at fault, the city to pay the expert \$6 per day and all necessary expenses if the trouble lies within local conditions.

The Railway Crossing

Rutherford, Jamieson and Grant enclosed a letter from the general solicitor of the C. P. R. concerning the crossing requested by the city over the railway tracks on First Avenue north. Vice-president Whyte would consent to this crossing, intimating the solicitor, providing the city pays all the costs connected with the installation and maintenance of the crossing. Council looked rather askance at the proposition and decided that it should be laid over for further discussion at the next regular meeting.

The Government telephone superintendent wrote asking permission to string a 50 pair cable across Mill viaduct in order that the rapidly increasing number of subscribers on the east side of the creek might be supplied without delay. Referred to public works committee and city engineer for a report.

A number of property owners in Richmond park petitioned for the grading of streets in that subdivision and protested against the present tax levy until this sort of improvement is made there. Ald. M. Rankin explained that a gang of 40 men are busily engaged in grading and grading large numbers of streets in the Richmond park to be reached within another week.

Ald. Vogel asked that a special meeting of the council be held this week to take up again the hospital agreement with the University.

Who Cuts The Grass?

Under inquiry Ald. Rankin wanted to know what system is in vogue for

the taking care of the city's boulevards. There appeared to be no system. Secretary Cox explained the Edmonton system of charging frontagers, and intimated that which they keep is paid for out of the general funds. Ald. Calder thought this the better to be adopted. Ald. Rankin thought the property owners should pay for the whole business. If the expense comes out of the general fund he would have to include \$100 or \$200 more in his estimates for the year, so rapidly have the boulevards extended.

Strathcona was referred to public works committee, city engineer and solicitor for a report.

Ald. Richards had a crisis of enquiries. Was the space between the C. P. R. rails on Whyte to be paved? The general opinion decided this had plan might be fixed with planking by the company.

Want Better Phone Service

Ald. Richards said he had failed to find with the telephone service at the local central on Sundays and during the evenings after 6 o'clock. At these times there is no employee about the exchange. "For my part I find that my phone usually goes wrong on Sunday," said Ald. Richards, "and I think there are enough subscribers in this town to deserve better consideration from the government." Council agreed to having the secretary write the telephone department calling attention to the situation.

Ald. Vogel moved that the mayor and secretary be given power to amend the remaining contracts for the supply of new equipment to the power house. On motion of Ald. Vogel council adjourned to meet Friday evening at 8 p.m.

Separate School Board Buys New Site

The school trustees of St. Anthony's district in this city have just taken up an option on block 12 between Fifth and Sixth avenues in the south end of the city, by way of making provision for a site for another separate school building. Under the growth of the city makes necessary an addition to present facilities. Following along the line of the present lines established by the public school board the trustees of St. Anthony's have for some time been looking out for some suitable site upon which a large central school may be erected when required and that purchased last week was considered as desirable in many respects. By facing on First street west it will be readily seen that with the extension of the city southward in coming years the new site will be centrally located and if the proposed street layout has been carried out Sixth avenue and Main it will be easily reached from the business section of the town.

Sound Incinerator Satisfactory

Ald. Tipton returned on this morning's train from Calgary where he went on a trip of inspection for the city council. Speaking to the Capital Ald. Tipton said he considered Calgary's incinerator a success in every respect and will give a full report on the subject at the adjourned meeting of the council here Friday night.

Strathcona Land

An excellent field of winter wheat is to be found on the farm of Robt. Turnbull some five miles southeast of the city. A sample of this crop which was brought in this week measures eighteen inches in height and Mr. Turnbull states that at the field of seven acres is of this superior class. The winter wheat throughout the district appears to be coming along very promisingly.

Mr. R. H. Christie, D. D. G. M., and Major Marshall, P. M., of the local A. O. U. lodge will be delegates from Strathcona to the Masonic Grand Lodge which is to be held at Banff tomorrow.

J. M. Douglas, M.P., will leave tomorrow morning en route to the coronation in London where he will be one of the representatives from Western Canada. His father Rev. Mr. Douglas will accompany him as far as Ottawa to attend the General Assembly of the Presbyterian church. Mr. and Mrs. Scott of this city also left for the east to attend the conference.

BITTER ATTACK ON AUSTRALIA IS AID TO OUR CLAIMS

London, May 31.—The claims of Canada as the oldest and most responsible British imperial territory in the matter of colonial emigration are being materially helped here by a severe attack on the bona fide character of the immigrants of her chief rival, Australia. Several returning colonists are making a smashing attack on the unsuspected disadvantages of life in the British dominions of a veritable Eldorado to be gathered from the commonwealth's official immigration agent. For instance, the land in central and northern Queensland, alleged to grow "anything" in many cases, turns out to be absolutely barren, not even fit for sheep-grazing. Contracts for growing on the new farms will be let in the course of a few days. Mr. Marshall leaves the city again this evening.

Edmonton's remarkable progress and the wave of settlement which is sweeping towards the Peace River, have become the talk of the most people, according to J. J. Walsh, Canadian manager of the Standard of Empire, who arrived in the city from Vancouver yesterday. Mr. Walsh prophesies that with the conclusion of the corporation festivities in Edmonton, an invasion of Canada by British capitalists the like of which has never been seen before will occur. Canada will be the Mecca of the British with money to invest.

On May 31, June 1 and 2, the 180th regiment, the Edmonton Public School cadets, will be inspected by Col. Grant, C.M.G., district commanding officer at Calgary. Recently the provincial department of education entered into an agreement with the department of militia and defence, in accordance with which the province accords a grant of \$1000 to the school for the purpose of the encouragement of physical drill and military training in the schools. The sum of \$1000 will be distributed in efficiency prize money in Calgary, Edmonton and Strathcona.

The chief offender in this respect. One disgraced farmer is now working as a navvy and is saving money, with the help of what his wife can earn doing, to get back as soon as possible to his native Middlesex. He went out in the high, he says, the high wages being supplied by an Australian immigration agent he met at a cattle show in London. Within a month after stocking his land in Queensland, described to him as "God's own country," 15 out of his 19 cows died from the fatal "red water," which the agent had neglected to mention. He sold the remaining four cows, and lost the deposit he paid on his land, for he can find no one to take it off his hands.

Another case of disillusionment is cited even worse than the first. A family from Essex started farming with 12 good Ayrshire and Jersey cows, but were unable to find any land and would not grow fodder enough even for that number of sheep. So they had to pay \$5 a week to a native farmer for grazing land, and though the wife and daughter worked hard at poultry raising, often starting milking at 3 a.m., and not finishing the day's work till seven in the evening, they could not make both ends meet. Then their cow died of the terrible red water and the family were ruined indeed. Now the husband is a casual labourer, the daughter has gone into domestic service, the son is working on a sugar plantation, and the wife has utterly broken down through worry and overwork.

According to this man's estimate, it costs twice as much to live in Australia as it does in England. The unemployed problem is as keen in Brisbane as it is in London. Another correspondent writes that the areas under wheat and grape cultivation are rapidly decreasing in extent. Especially in the last few days of the year, the venture and fortune awaited the solitary colonist. There was no avenue open to the working man in modern Australia but that of grinding drudgery.

Reports such as these are being given considerable space in the home papers just now. That accounts for the practical unanimity with which this year's British emigrants are making for the west. Especially is this true of the north countrymen, the best type of settlers to be found. Several batches from Cumberland, Westmorland and Yorkshire are leaving this week, their destinations being described by an agent as Winnipeg, mostly in Canada, and Colorado, Oregon, Utah and Washington, chiefly in America. They are keen on getting on the land in the west.

CONTRACTORS CONSULT ON CONSTRUCTION OF H. B. R.

Ottawa, Ont., May 31.—Contractors are here today consulting officials of the railway depots with reference to the laying out of the first 180 miles of the Hudson Bay railway for which tenders are to be made. Lines will be built from Fort Churchill to the north and will cost approximately four millions contractors figure on having supplies on ground next spring and the work completed by end of 1912.

TOO LATE TO CLASSIFY
